CVS-300
AAMA*101-97: R35/R25, IGCC-CBA

The series 300 single-hung welded vinyl window feature a tilt-in bottom sash ensuring safe, easy cleaning for interior & exterior surfaces. Crystal also features 7/8" Intercept Insulating Glass, which provides high energy-efficiency. This unique "warm edge" design keeps your home comfortable while saving you money on heating and cooling costs.

This means that choosing Crystal will benefit you and your family for years to come.

*American Architectural Manufacturers Association

PPG's Intercept® insulating glass spacers improve overall window efficiency.

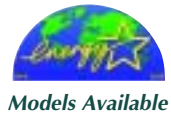

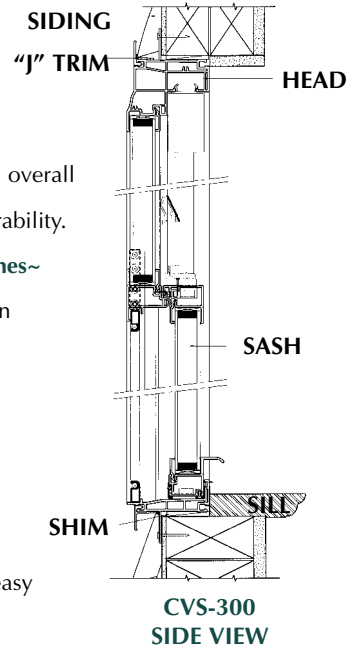

The clear choice for value. It's your new home. Make sure your window choice will eliminate headaches now and ensure comfort and energy savings for years to come. Make sure your window choice is Crystal.

Whether it's single hung, two-lite single slider, three-lite slider (middle lite fixed), hopper, picture or circle top windows you're after, every window in this Crystal line provides these important *standard* features.

- **State-of-the-art computer integrated manufacturing**~ ensures timely delivery of outstanding windows.
- **Heavy-duty multi-cavity vinyl construction**~ with an overall frame depth, of 2 5/8" which ensures strength and durability.
- **Full fusion-welded corners on master frame and sashes**~ provide perfect alignment, long term proper operation and a clean appearance.
- **Sloped sill**~ ensures quick, easy water run-off.
- **Double-seal weatherstripping**~ prevents air and water infiltration.
- **Integral Fin**~ full perimeter prepunched nailing fin.
- **Easy take-out locking shoes**~ with "T" pivot bar for easy sash removal/installation.
- **Knife latch screen retainer**~ better looking & more secure.

Crystal provides these *optional* features to their full line of new construction fully welded vinyl windows.

- **Custom grids**~ colonial, diamond, or georgian to enhance the beauty of your windows.
- **Architectural shapes**~ provide that special look.
- **Argon filled**~ a colorless inert gas can be used to replace air in an insulating glass unit which, decreases heat transfer significantly.
- **Low-E glass**~ substantially increases thermal window performance.
- **"Energy Star" certified**~ when ordered with both Low-E and argon.
- **Snap-In J channel**~ gives window a uniform finished appearance when siding the exterior.
- **Enhanced AAMA rating**~ R-35 optional.
- **Builder's drywall pass-thru window.**
